Nguyen The **Chinh**

FULLSTACK DEVELOPER

Hanoi

0566113369 nguyenthechinhk25@gmail.com https://portfolio.chinhnt.xyz chinhnt113

About Me

Fullstack developer with 4 years of experience building scalable web applications. Strong in Java Spring Boot on the backend and ReactJS/TypeScript on the frontend. Experienced with messaging systems (Kafka, RabbitMQ) and real-time communication (WebSocket). Actively leveraging AI coding tools like Claude Code and Cursor to boost productivity.

Experience

Fullstack Developer — Sapo GO

Sapo Technology JSC

Jul 2022 - Present

- Led end-to-end frontend migration: Node 14 → 18, React 16 → 18 (improved build performance by 40%, aligned project with current LTS).
- Built Social Channel feature for Facebook, Instagram, and Zalo sellers — includes live chat, inventory sync, automated messaging scripts, and analytics dashboard (Kafka + WebSocket for real-time updates).
- Developed and maintained backend APIs with Java Spring Boot; managed frontend with ReactJS and Redux state.
- Integrated Sentry for real-time error monitoring and performance tracking — enabling faster root cause identification and reducing time spent on bug resolution.

Fullstack Developer — Sapo Marketplace

Sapo Technology JSC

Feb 2026 - Present

- Developed Marketplace Channel feature enabling Shopee, TikTok Shop, and Lazada sellers to manage orders and sync product data from a single platform.
- Built browser extension for TikTok Seller to crawl and enrich customer phone numbers for targeted marketing campaigns.

Frontend Developer — Sapo Social Mobile

Sapo Technology JSC

Jan 2025 - Jun 2025

- Built mobile app interface with React Native and integrated REST APIs for Sapo Social Channel, serving thousands of social sellers on the go.

Frontend Developer — Facebook Shopping

Sapo Technology JSC

Oct 2024 - Feb 2025

- Developed Facebook Catalog and Facebook Live Shopping interfaces with TypeScript, integrated into the Sapo platform ecosystem.

Projects

Personal Portfolio

Personal Project

Mar 2026 - Present

- Built and shipped a production-ready portfolio using AI-augmented workflow — BMAD agent orchestration + Claude Code throughout the SDLC (spec, implementation, tests, CI/CD).
- Backend: Spring Boot (GCP Cloud Run) + Frontend: React/TypeScript (Vercel); WebSocket for real-time UI; PostgreSQL for persistence.
- 222 passing tests; CI/CD pipeline live on day 13.

Hospital Booking System (Graduation Thesis)

HUST

2022 - 2023

- Full-stack booking and healthcare info system for clients and admins.
- Implemented load-balancing with nginx for production deployment.
- Stack: ReactJS, NodeJS, Python, MongoDB, nginx.

Skills

Languages	Java, TypeScript, JavaScript, Python
Frontend	ReactJS, React Native, Redux, WebSocket
Backend	Spring Boot, NodeJS, REST APIs
Database	MySQL, MongoDB
DevOps	Docker, nginx, CI/CD (GitHub Actions)
Messaging	Kafka, RabbitMQ
AI Tools	Claude Code, Cursor

Education

Hanoi University of Science and Technology **Hanoi**

Global ICT Program — Bachelor of Engineering in Information Technology 2018 - 2023

- Program focuses on English communication and global engineering skills.

Certificates

TOEIC Listening & Reading — Score: 930

Feb 2023
